Project4.2:
Twitter Engine

Start server using command-
$ mix phx.server

Functionalities:

- Register User
  User *DOS*, User *TA*, User *student* have been registered
- Login
  User *DOS*, User *TA*, User *student* have been logged in.
- subscribe other users
  user *TA* is following DOS, user *student* is following TA
- Tweet
- Display tweets from subscriptions or tweets in which user has been mentioned – News feed
  DOS's tweets are displayed in news feed of user student
- Retweet
  If user *TA* is following user *DOS*, user *student* is following user *TA*. DOS's tweet is displayed in news feed of TA and TA can retweet any of DOS's tweets. After TA retweets user DOS's tweet, it is displayed in followers of user TA's news feeds, here user *student*.
